

HARSH VIPUL SHAH

B.Tech CSE (AI & DS) | AI/ML • Data Analytics • Software Development

Pune, Maharashtra, India | harshvshah2019@gmail.com | linkedin.com/in/harsh-vipul-shah | github.com/harshvshah12 | harsh-gray.vercel.app

PROFILE

Third-year B.Tech CSE (AI & Data Science) student at MIT World Peace University with hands-on experience in AI/ML, computer vision, data analytics, and full-stack development. Experienced in building applied systems with Python, FastAPI, Next.js, YOLO and Power BI, alongside business development, sponsorship, budget and international logistics responsibilities for a university engineering team.

EDUCATION

MIT World Peace University, Pune — B.Tech in Computer Science & Engineering (Artificial Intelligence & Data Science), 2024–2028, CGPA: 8.2/10

Bright Day School, Vadodara — Class 12, 2024

Chettinad Vidyashram, Chennai — Class 10, 2022

EXPERIENCE

Vegapod Hyperloop, MIT-WPU | Business Associate | Aug 2025 – Sep 2026

- Business development and sponsorship outreach; airline partnerships; component purchasing and material sourcing; international competition travel arrangements; sponsor communication, budget coordination, proposals, logistics and external partnerships.

Linde Engineering India Pvt. Ltd., Vadodara | Data Analysis Intern | Jun 2025 – Jul 2025

- Power BI analysis, reporting, dashboards, visual reports and data models; explored React JS and Apryse WebViewer for document-centric applications and enterprise workflows.

Synapse AI Club, MIT-WPU | Organizing Team Member | Jan 2025 – Sep 2026

- Helped organize an 8-session AI, Data Science and NLP workshop series through ideation, marketing, logistics and speaker coordination.

SELECTED PROJECTS

Deepfake Sentinel — EfficientNet • ResNet • MTCNN • Grad-CAM • FGSM. Deepfake detection using model ensembles, face extraction, explainability and adversarial robustness testing.

Dynamic Hotel Pricing Management System — Python • Machine Learning • Ensemble Learning. Predictive pricing system combining multiple models through ensemble learning.

ParkSense — YOLOv8 • FastAPI • Next.js • Computer Vision. Parking detection and analytics for occupancy, capacity and spatial heatmaps.

ESP32-CAM Gesture Recognition — ESP32-CAM • MediaPipe • Random Forest • React. Hybrid CV/ML gesture recognition with React dashboard.

Maze Algorithm Visualizer — Python • Tkinter • A* • BFS • DFS. Interactive GUI for pathfinding visualization and algorithm comparison.

TECHNICAL SKILLS

Languages: Python, C, SQL, HTML | **AI/ML:** Machine Learning, Deep Learning, Computer Vision, YOLOv8, MediaPipe, OpenCV | **Data:** Power BI, Tableau, Data Visualization, Data Modeling | **Web/Backend:** React, Next.js, FastAPI, Streamlit, Firebase, Supabase | **Tools:** Git, GitHub, Apryse WebViewer, Tkinter, Docker

LEADERSHIP & INVOLVEMENT

- PrismLabs, MIT-WPU — Technical Member | Apr 2025 – May 2026

- Synapse AI Club, MIT-WPU — Technical Member / Organizing Team | Jan 2025 – Sep 2026

- Vegapod Hyperloop, MIT-WPU — Project Management / Business Associate | Aug 2025 – Sep 2026

ACHIEVEMENTS

- Vegapod Hyperloop — EHW 2026: #8 globally; top nominees / top two worldwide for Outreach & Showcasing; Upcoming Engineering Innovation Award.

- Pinnacle Coding Competition — Advanced to Round 3 in DSA (Python), competing against 4th-year students.

- SciQuest 2025 — Recognized for Project Excellence.

- IQOO Hackathon 2026 — Team ranked 22 out of 1,500+ teams.

CERTIFICATIONS

HackerRank — Python (Basic), Problem Solving • IBM — Artificial Intelligence Fundamentals, Data Fundamentals, Big Data 101 • OpenCV University — Python For Beginners • Microsoft & LinkedIn — Career Essentials in Generative AI • NASA — Space Apps Challenge Hackathon Project Excellence
